

Summaries based on 168318 interventional studies.

Source of funding is derived from lead and collaborator information. If the lead sponsor was from industry or the study had industry collaborators without National Institutes of Health (NIH) involvement, the study was categorized as industry funded; if the NIH was involved as a sponsor or collaborator and the lead sponsor was not from industry, the study was classed as NIH funded; all other studies were classed as funded by nonindustry, non-NIH sources.

Cumulative % of studies completing/terminated is estimated by Kaplan Meier method. Time is censored at the date when content was downloaded from ClinicalTrials.gov. Analysis is restricted to 152935 interventional studies that are not Early Phase 1, withdrawn, studies not yet recruiting, and studies with start date after date content was downloaded from ClinicalTrials.gov.

Cumulative % of studies reporting results is estimated by Kaplan Meier method. Time is censored at the date when content was downloaded from ClinicalTrials.gov. Analysis is restricted to 19321 interventional studies in Phase>1, with at least one US site and a drug/biological/device intervention, that were listed as Completed/Terminated when content was downloaded from ClinicalTrials.gov. Studies are excluded from analysis if they are missing both the primary completion and completion dates. Funding source is derived from lead and collaborator information.
